

# DRUMS & IBC'S

## Bin General Description

The containers for powders and granulates are designed and built according to the cGMP directives to be used in the pharmaceutical, chemical and food sectors and can have various shapes and sizes based on their use.

The same container can be used in mixing operations when used with a Tumbler.

The structure of the BIN has been designed to make the container easy to handle with any lifting means, be it a transpallet or a forklift.

The BIN can also be equipped with accessories depending on the use that will be made of it.

### Main characteristics:

- » No dead spots or difficult to clean
- » Square section to optimize the logistics aspect.
- » Inclined top to avoid water stagnation during washing
- » Legs with circular section
- » Large lid with clamp connection and safety pin
- » FDA approved translucent platinum silicone gasket

### Tablet Bins

Available sizes from  
150 – 600 Litres

## Available sizes

diameter 800mm

## Drums
